Living DNA Test

Link to this video: https://youtu.be/kvYcVQcw97k

LivingDNA is one of the newer DNA companies, they launched their test kits at Rootstech in 2018. They offer three DNA products, the "Full Ancestry Kit", the "Wellbeing" kit and a package for both the "Full Ancestry" and "Wellbeing" combined. Currently, prices start at $79. Alternatively, you can upload your DNA for free from another service.

You can upload your DNA for free (as of 1-6-21). This free upload option will likely go away once the company is well established with plenty of DNA kits uploaded.

LivingDNA is the official DNA company for FindMyPast. If you have a FindMyPast membership, you can upload your DNA from another DNA company from either FindMyPast or LivingDNA.

Living DNA accepts uploads from 23andMe, Ancestry, or MyHeritage. All are autosomal only DNA.

To upload your DNA for free:

1) Download your DNA from one of the above-mentioned companies. These typically come down as a Zip file. Do not unpack the Zip file.
2) Go to LivingDNA.com and scroll down below the ads for purchasing a kit and there is an upload button. Follow the directions at Living DNA… You will then upload your DNA zip file.
3) It may take a few days to see the results from your upload.

To purchase a kit, watch for sales. Especially around the holidays (specifically around Christmas, Mother's Day, Father's Day, Memorial Day, Veteran's Day, etc.) all DNA companies will typically offer sales for their DNA kits.

For those in the U.S. wishing to purchase a kit, below are the Genealogy TV affiliate links.
